ROAD CONSTRUCTION UPDATE

For Immediate Release: Tuesday, September 20, 2016

County Roads to be Resurfaced

The Logan County Engineer's Office announces that the Strawser Construction Inc. will be applying a mastic surface treatment to County Road 272 and County Road 286. The tentative starting date is Thursday, September 22, 2016, weather permitting.

County Road 272 and County Road 286 will be under construction between the hours of 7:00 A.M. and 5:00 P.M. each day. Sections of the county roadways will be closed to all traffic as the work progresses. Residents are asked to use the cross streets for access to their homes during these short duration closures. Please refer to the door flyers for specific information.

When traveling through these work areas, we ask that you please use caution.

This is an innovative pavement preservation treatment called ONYX that will be paid for with Sales Tax Funds. The product is designed to seal the surface, create surface friction and extend the life of the existing pavement.

All scheduling is subject to weather conditions. We appreciate your cooperation during the construction and we apologize for any inconvenience.
