Road Closure Update

For Immediate Release: September 29, 2015

McColly Covered Bridge (LOG 13-1.56) Open to Traffic

McColly Covered Bridge (LOG 13-1.56) recently underwent a rehabilitation and restoration project funded with help from the National Historic Covered Bridge Program. This program funded 80 percent of the project and the Logan County Engineer funded the other 20 percent. The total cost of the project bid is \$168,533.75. Work included restraining the outside of the structure, application of a fire retardant paint to interior members, and interior aesthetic lighting. The renovations on this historically significant structure were done for the continued benefit of local residents and tourists and to help deter vandalism. The primary contractor for the project was Brian Brother's Painting and Restoration out of Piqua and Thompson Electric of Bellefontaine performed the electrical and lighting work. A grand opening ceremony will be scheduled in the near future.

This structure will be closed for a one day closure for the final electrical components to be installed.
