Book 597 Page 34

Hamilton Survey Lot 2430  
Without streets

$$GL(\text{Field}) : GL(\text{Plat}) = BF(\text{Field}) : BF(\text{Plat})$$

$$GL : 156 = (512'-4" - 92'-6") : (506'-6" - 92'-6")$$

$$GL : 156 = 419.83 : 414.00$$

$$GL = \frac{15 \cdot 414.00}{419.83} = 150.74$$

Mr. Hamilton says that the monuments  
in Park St are now on  $\frac{1}{2}$  of street.  
The Plat. Book gives this monument  
line 15' from property line on  
West and 25' from property on  
East. I used this as an  $\frac{1}{2}$  of  
Sty using 20' for half of  
Park St.

Stone at "C" & Madriver & IRVING  
Stone flush with street No cross on stone  
Curb W. 15'-1"  
S.E. Corner of Brick house N.W. 65'-0"  
& Manhole E 4'-10"  
S. End. G.I. Inlet N.E. 25'-6"  
3" Maple tree S.E. 37'-5"
